1 November 1967

MEMORANDUM OF CONVERSATION

25X1

SUBJECT: Telephone Conversation between [redacted]  
and Mr. William McAfee re Mission 6734

1. Mr. McAfee called at 1030 on 1 November and said that the Ambassador (Kohler) and others had noted the cable traffic concerning specifically Mission 6734. Mr. McAfee said that they were interested to know if an analysis was being made of the SAM firings against the mission aircraft. He requested that if any change in the vulnerability factor given State and the 303 Committee should develop as a result of such analysis, they be notified promptly.

2. His rationale was that State Department, at least, had approved the nine missions for November based on the vulnerability factors provided to them and that they felt we were responsible for making them aware of any changes in these factors, such as might result from the analysis of 6734.

3. I told Mr. McAfee I did not know the answers to these questions at the moment and would make a record of his call and pass the information to General Bacalis.
